## Disparity Activation Fix

Download ->->->-> <http://bit.ly/2SMzk6J>

## About This Game

Disparity is an extreme precision 2D Puzzle Platformer based around one core mechanic: swapping the polarity of levels. Swapping the polarity may cause the level to open new paths, or could just affect the way your character interacts with certain blocks.

You play as a virus developed with the task of robbing a bank to help a man save his sick wife. Once you clear some computer trials, gather some upgrade data and shut down a firewall you'll be able to get the money and save his wife.

---

Or at least, that's what you're supposed to think.

## **Game Features**

- 60fps
- Two different endings depending on how you play.
- Multiple boss fights depending on each ending
- Gamepad Support
- Original Chiptune Soundtrack
- Over 80 unique levels, ranging from very easy to insane difficulty.

---

Title: Disparity  
Genre: Indie, Strategy

Disparity has one of the simply best game mechanics that I have ever seen. You switch between polarities, positive and negative, to pass each platforming level and/or boss battle. I currently have not played this game to its full extent but I am currently trying to spread the word about this game with this review and by posting videos on YouTube (Euro43)

This is a must have if you are low on cash in your Steam Wallet. It's only \$1.10, and it is an absolute steal. I'd easily pay 10 dollars.. Disparity is a fantastic 2 ending puzzle-platformer. The hard 2D challenges make it a perfect game for speedrunning. The game, to make it even better, has both bosses and a story. On top of all this, the multiple worlds are all different with their own unique challenges. All of these facets make this game one you should definitely get and play for a while.. Now that's one amazing indie game, just wow. If you're looking for a challenge, maybe want to set a record for a speedrun then get this game. Surprised that not many people know about this game, it's definitely worth its price and I would recommend it for anyone who loves platforming puzzle games.

PS. THE SOUNDTRACK IS AMAZING.. A fun and challenging platformer with 2 Endings and Replay Value.

Pros: Multiple Ends, Interesting Mechanics, and it's not too easy nor hard.

Cons: My only con is the game is kinda short and I wish this game got a sequel and more praise.. Game is amazing, graphics awesome. Endings, bad is sad, good is great. I just don't know how to get the good end. I always did a new game and then I get the bad ending. I may need help!. Don't be fooled by my playtime. I played this offline.

If you're trying to get both endings, this game will give you, at least 9 hours worth.

9 hours that I'll never regret.

Story's amazing, level design was amazing, soundtrack was amazing, overall was amazing. Easily one of the most underrated platformers out there, and it had some of the most fun and innovative content in a platformer I seen in over a year.

If this is on your wishlist, what are you waiting for?

It's only \$1. I use more on pencils.

I fully support these devs, and I wish for more amazing content from you, Tamation.

I'd give it a 9/10.

---

I love this game and the storyline!

This game is amazing, the mechanics are getting cooler as theres invisible blocks! I really like the look of the game and i LOVE the music. Im currently on hospital system world which is very hard. Overall this game is one of my alltime favorite games, mostly because of the boss battles!

I would reccomend this game to anyone with 1 dollar to spend who dosnt know what to do with it!. This is a really fun game. The polarity mechanic is really creative and the level design is great. The soundtrack is amazing and I would buy it. I do have some problems though. The difficulty really spikes when you are up against bosses, maybe I'm just bad but it really seems to have an unfair spike there. Same with the hospital, you put the 2nd or maybe even the hardest level as 6-1, it was really annoying. I really felt that you could convey the fact that you could flutter multiple times in the air better as I got stuck on 2-1 when I didn't know how to cross a gap. Sometimes when I am near the edge of a platform I will try to jump while running and only flutter. Maybe this is a fault of the engine but I don't know. Other than that I have no problems. Great game and great music that I would reccomend to anybody!. short but good. 9/10. Great puzzle-platformer with levels that get a little more difficult as you get farther. However there is one issue, when using controller you use the LT button to switch polarity from + to - but after you press button, it almost always goes from from + to -, right back to + causing you to die in some levels. Its very possible that it is just my controller ( Logitech F-310, bought used on eBay) but I wouldn't consider this gamebreaking because movement with LEFT and RIGHT arrow and switching polarity with UP arrow is just as good as would be using controller in my opinion. Would still give thumbs up.

One more thing, to anyone thinking of buying this game or new to it, the pink and blue disappearing platforms can be a real pain in the\u2665\u2665\u2665\u2665\u2665but once you get past them, its a really great game. Also, careful with the start screen. The first option is new game which can erase your progress.. At first, I expected that this was going to be a "mediocre, beginner game". Boy was I wrong.

Right as the game started, I was impressed by the graphics. Sure, they weren't the best in the world, but they were definitely pleasing. Just the overall layout and intuitive interface was great in my opinion.

Pros:

- Pleasing graphics
- Great soundtrack
- Steady progression
- Cool background story
- Challenging yet fun levels
- Smooth controls
- Awesome core game mechanic!
- Controller support (I don't own one, but I bet other people like this)

Cons:

- Some levels seem repetitive
- Especially noticed in zone 3 \ 4, a lot of the challenge was to be running back and forth
- Control keys (keyboard) were a bit wierd to use

Story (minor spoilers):

- (As of writing this I haven't finished the game so this is just what I have gathered)

You play as a virus inside of a computer network. The virus was created by the husband of a dying woman. The couple do not have sufficient funds to pay for (some sort of) operations to be done. You, the virus, are designed to travel through multiple networks and eventually break into a banking network to steal money. This is as much as I have learned so far.

My rating: 8 \ 10

Yes I would definitely recommend the game to someone else... Definitely worth the dollar!

---

- Ty. Good to go.

And that's a game is better or worthy

I want to "You Have to 10 Seconds 3" releases.. This game looks good, it plays well (though some hitboxes are larger than the sprite, which means occasionally you die without hitting them), and has great music. Great speed game as well, except for the fact that it occasionally locks at 50 or 55 fps, making you noticable slower and making speedrunning this impossible. Definitely worth the 80p for a single playthrough though.
