Title: RUN
Genre: Action, Indie, Simulation
Developer:
POPSAUR
Publisher:
POPSAUR
Release Date: 19 May, 2017

a09c17d780

English

I think this is not a game, but a psychological experiment to see if you'll keep playing over a certain threshold. If you play for over an hour, you're clearly a nihilistic suicidal murderous psychopath with low self-esteem and developmental problems aka current presidential material

My therapist said I was one, but I could only play this game for ~20 minutes.

Rating 2/10 Not worth it, not even for free. Only download and play if you hate yourself. Even with Pacman, the music was not this annoying and once you ate all the "coins" the level would end and you could eat your enemies with powerups ... not so in this nightmare endless maze with dumb AI enemies . This is a surreal first person seated VR game inspired by Pac Man. I played for about 20 intense minutes. I enjoyed the game, the psichedelic effects and the overrall experience. I couldn't completely clean up the maze so i am not sure about the goal of the game, if there's an ending or it's just score attack. Again, for 2 Euros or less i reccomend to try this seated experience and have a laugh. There's clearly some potential so i reccomend the developers to add at least a couple of mazes as good as this one, with new tricks and traps.
